Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2815

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1,5-9,13-17 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Wada et al '388.

Wada teaches in figure 22 an SOI SRAM cell with first and second access NMOS transistors Q5 and Q6; a first drive NMOS transistor Q1; a first load PMOS transistor Q3; a second drive NMOS transistor Q2; a second load PMOS transistor Q4; and wherein the PMOS transistor active areas make a 90 degree angle with the NMOS transistor active areas. Accordingly claim 1 is anticipated. Claim 5 is also rejected as Q1, Q3 and Q5 form a first active area and Q2, Q4 and Q6 form a second active area. Claim 6 is rejected as the drain regions of the drive NMOS and load PMOS contact each other in figure 22. Claims 7 and 8 are likewise rejected from figure 22 as the source and drains contact each other and are in "shared" regions. Claims 9 and 13-17 and 21 are rejected as above.

Claims 2-4,10-12, 18-20 and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2815

Claim 23 is allowed.

Yoshikawa '473 is relevant art.
